SAHIL IJAZ

DevOps & Software Engineer | Automating Cloud Deployments & CI/CD Pipelines

+92-302-4891399 • sahil@sahilijaz.tech • Lahore, Pakistan • linkedin.com/in/sahil-ijaz-a75b15281 • github.com/Sahilljaz

PROFESSIONAL SUMMARY

DevOps-focused Software Engineer with hands-on experience building real-time, production-grade systems using Node.js, Next.js, React.js, and Python. Proven ability to architect scalable backends, automate cloud deployments and CI/CD pipelines, integrate AI/RAG pipelines, and ship cloud-native applications on AWS, Vercel, and Render. Delivered solutions across social platforms, telehealth, e-commerce, and AI tooling. Actively pursuing deeper expertise in Agentic AI, LangChain, and LangGraph.

PROFESSIONAL EXPERIENCE

Software Engineer (DevOps Focus) | Tinkerbyte Labs | Lahore, Pakistan · Hybrid **April 2026 – Present**

Software engineering company delivering full-stack products and engineering solutions for clients.

- **Full-stack & web engineering:** developed robust RESTful APIs and modern web applications using Node.js, Next.js, and PostgreSQL.
- **Cloud & infrastructure:** provisioned and maintained AWS cloud environments (EC2, S3), ensuring reliable hosting and server configuration.
- **Containerization & deployment:** containerized services with Docker to standardize environments across development and production; handled application deployments and release cycles.
- **CI/CD & automation:** streamlined build and deployment workflows to reduce manual effort and support continuous delivery.
- **Collaboration & standards:** worked in an agile hybrid setup, participating in code reviews, database optimization, and system architecture planning.

Full Stack Developer | Gamma Developers | Lahore, Pakistan **March 2026 – April 2026**

Digital solutions company delivering scalable web, mobile, AI chatbot, and cloud-based systems.

- Built full-stack solutions including custom CRMs, responsive websites, and mobile applications.
- Developed AI-powered chatbots to automate support workflows and improve customer engagement.
- Architected cloud-enabled systems designed for scalability and optimized performance.

Backend Developer | Bridge Zone | Lahore, Pakistan **July 2024 – March 2026**

Mobile app development company specializing in scalable digital solutions.

- Engineered 5+ production-grade real-time backend services using Node.js, Express.js, and RESTful API patterns.
- Integrated Socket.IO, Stripe, and Agora; deployed on AWS EC2 with S3 media management and Railway staging.
- Collaborated with clients to capture requirements and propose practical backend solutions.

PERSONAL PROJECTS

Grocio — Multi-tenant E-Commerce Platform

Tech Stack: Next.js, React, Node.js, PostgreSQL, Redis, Netlify, Render, GitHub Actions

- Built multi-tenant architecture with JWT auth, cart, order management, and admin panel.
- Configured CI/CD via GitHub Actions; deployed on Netlify and Render.

StudyMate — AI Full-Stack RAG Application (PDF Chat)

Tech Stack: Python, FastAPI, FAISS, Claude AI API, Next.js 14, TypeScript, Tailwind CSS, Vercel, Render

- Built end-to-end RAG pipeline: extracts/chunks PDF text, stores embeddings in FAISS, retrieves context, and generates sourced answers via Claude AI API.
- Engineered FastAPI backend with pdfplumber for parsing; resolved Python dependency conflicts in production.

AI Resume Analyzer — AI-Powered Resume Feedback Tool

Tech Stack: Next.js, TypeScript, Node.js, Express, Claude AI API, Vercel, Render

- Parses uploaded PDF resumes, matches against a job title, and returns AI-generated scoring and gap analysis.
- Built REST API with Node.js/Express/TypeScript; integrated Claude AI API for LLM-driven feedback.

PROFESSIONAL PROJECTS

- **Anaya** — Social media platform for story sharing, messaging, and content discovery with a custom feed algorithm.
- **MundoSalud** — Telehealth platform enabling real-time doctor consultations, appointment scheduling, and admin controls.
- **Connect Hub** — Full-stack social media app built with Next.js and real-time chat powered by Socket.IO.
- **MulberryTree** — Community platform for chefs, users, and farmers to share recipes, courses, and event announcements.
- **FishScout** — Real-time fishing community app with active spot tracking, weather integration, and social features.
- **CoachMaster-Web** — Web app for coaches to strategize, assign roles, and analyze team formations ahead of matches.

TECHNICAL SKILLS

Languages & Frameworks: Node.js, Nest.js, Express.js, React.js, Next.js, Python, TypeScript, JavaScript, Mongoose
Databases: MongoDB, PostgreSQL, SQL, Redis, FAISS (vector DB)
AI & ML: LangChain, LangGraph, RAG pipelines, Vector Databases, FAISS, LlamaIndex, Claude AI API, CrewAI, AutoGen
Cloud & DevOps: AWS (EC2, S3, Route 53), Docker, Linux, Vercel, Render, Railway, Netlify, GitHub Actions (CI/CD)
Tools & Protocols: Git, GitHub, Socket.IO, Stripe, Agora, REST APIs, JWT, FastAPI

CERTIFICATIONS

IBM RAG and Agentic AI Professional Certificate — IBM / Coursera | April 2026

- 8-course program covering Generative AI, RAG applications, vector databases, multimodal AI, LangChain, LangGraph, CrewAI, and AutoGen.
- Built and deployed RAG-based applications with advanced retrievers and vector database integration.
- Designed and implemented AI agents and multi-agent systems using LangChain, LangGraph, CrewAI, and AutoGen.
- Developed multimodal generative AI applications (text, image, document pipelines).

Additional certifications:

- Advanced RAG with Vector Databases and Retrievers | IBM / Coursera, Sep 2025 (LlamaIndex, LangChain)
- Build Multimodal Generative AI Applications | IBM / Coursera, Aug 2025 (LangChain)
- Vector Databases for RAG: An Introduction | IBM / Coursera, Jul 2025
- Build RAG Applications: Get Started | IBM / Coursera, Jul 2025 (RAG, LlamaIndex)
- Develop Generative AI Applications: Get Started | IBM / Coursera, Jul 2025 (LangChain)
- Vista Equity Partners AI in Action Job Simulation | Forage, Dec 2025
- Object-Oriented Programming in JavaScript | Eduonix, Feb 2024
- CSS3 and HTML Development by Building Projects | Eduonix, Dec 2023
- PHP Back-End Development | Great Learning, Jul 2024

EDUCATION

Bachelor of Information Technology — Bahria University, Lahore, Pakistan **Expected Graduation: 2026**

LEADERSHIP & COMMUNITY

Speaker, GDGoC Backend Bootcamp — Google Developer Group on Campus, Bahria University

- Delivered hands-on backend development workshops to fellow students, covering API design and cloud platform integration.

LANGUAGES & INTERESTS

Languages: English (Fluent) | Urdu (Native) | Punjabi (Fluent)
Interests: System Architecture, Real-Time Applications, Agentic AI, Open Source, SaaS Products
